# INTRODUCCIÓN

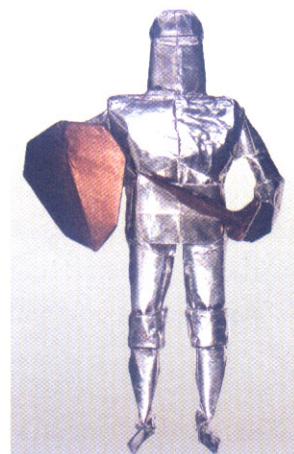

*La papiroflexia es el arte del plegado del papel y, como todo arte, tiene algo de magia, ya que la posibilidad de transformar un simple trozo de papel, sin cortar ni pegar, en una criatura reconocible, convierte al aficionado al «origami» en un pequeño mago que puede sacar de la nada un montón de figurillas que asombrarán a propios y extraños.*

*En nuestra afición es muy importante la imaginación, aquel lugar de nuestras cabezas de donde proceden la mayoría de los mitos y leyendas que conforman nuestra cultura. Así pues, de la unión de la imaginación y de la magia de la papiroflexia, surge este libro, dedicado a las criaturas fantásticas, en el que se da una nueva vuelta de tuerca a la papiroflexia compleja, donde podemos encontrar diversas técnicas de creación de modelos y en la que he hecho especial hincapié en conseguir el color adecuado para cada parte de la figura, pero, eso sí, «con un solo papel, sin cortar, sin pegar y sin pintar».*

*Lo más importante para tener éxito en el plegado es seguir con atención los diagramas, elegir un papel adecuado y mucha paciencia. Espero que disfrutéis con este papiro mundo de monstruos y bestias que no se esconden en rincones oscuros, sino detrás de cada pliegue del papel.*

# EL PAPEL

Las figuras pueden plegarse con cualquier papel fino; no obstante, el mejor resultado se obtiene con el llamado papel «sándwich», que es un papel que podemos elaborar nosotros mismos.

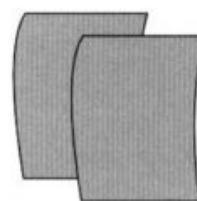

Consiste en un papel compuesto por una lámina de papel de aluminio y dos papeles de seda. Su principal ventaja es que podemos combinar distintos colores y es muy fino, moldeable y duradero.

Los materiales que necesitamos para fabricarlo son: papel de aluminio, papel de seda, pegamento de barra, una plantilla cuadrada de cartulina, un lápiz y unas tijeras.

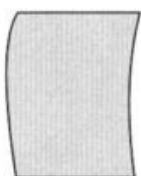

El papel tendrá los lados irregulares, por lo que, para obtener un cuadrado perfecto, nos guiaremos por la plantilla cuadrada de cartulina y dibujaremos con ella el contorno del cuadrado.

Finalmente, recortaremos por las marcas y tendremos un magnífico papel listo para plegar.

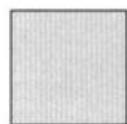

Papel de seda

Papel de aluminio

Lápiz

Plantilla

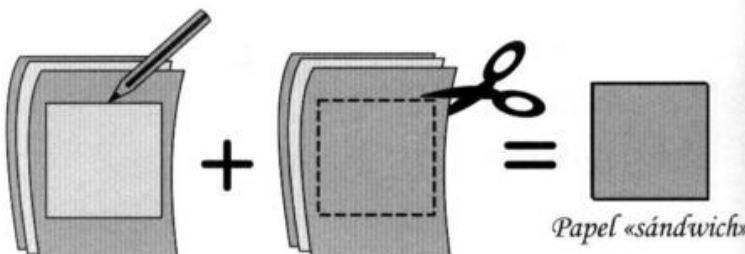

Tijeras

Pegamento de barra

En primer lugar, damos pegamento a una de las caras del papel de aluminio y, sobre ella, pegamos el papel de seda.

A continuación, damos la vuelta al papel y volvemos a dar pegamento en la otra cara del papel de aluminio. Sobre ésta, pegamos otra lámina de papel de seda. Conseguiremos así una especie de «sándwich» formado por tres capas de papel.

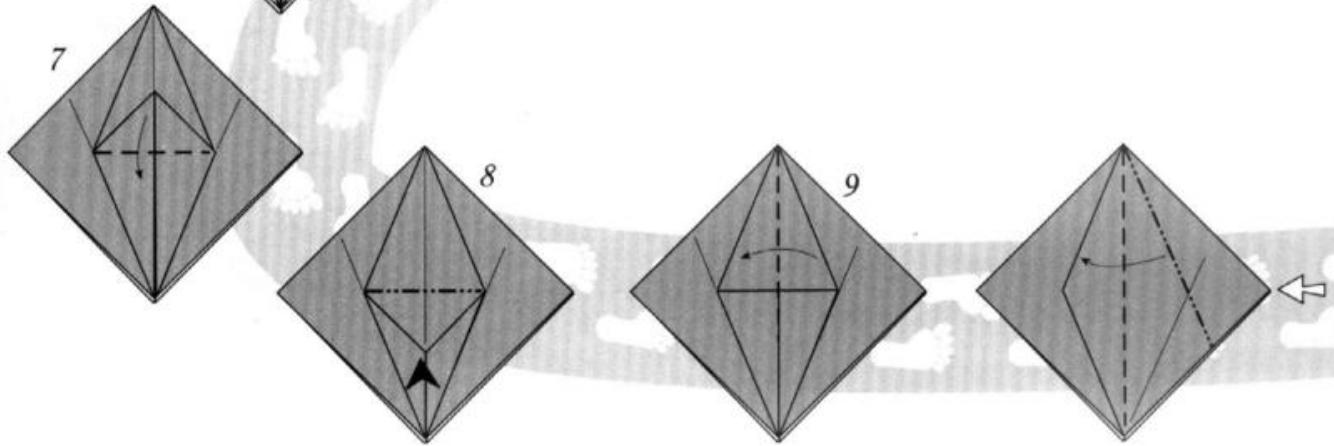

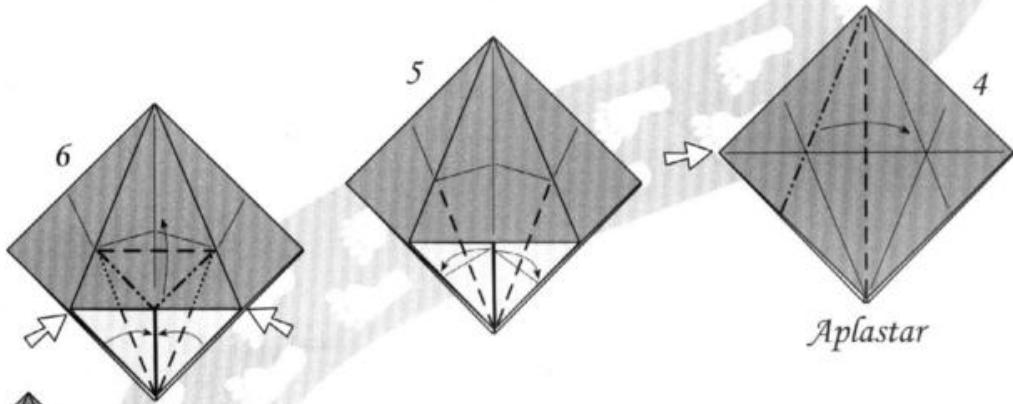

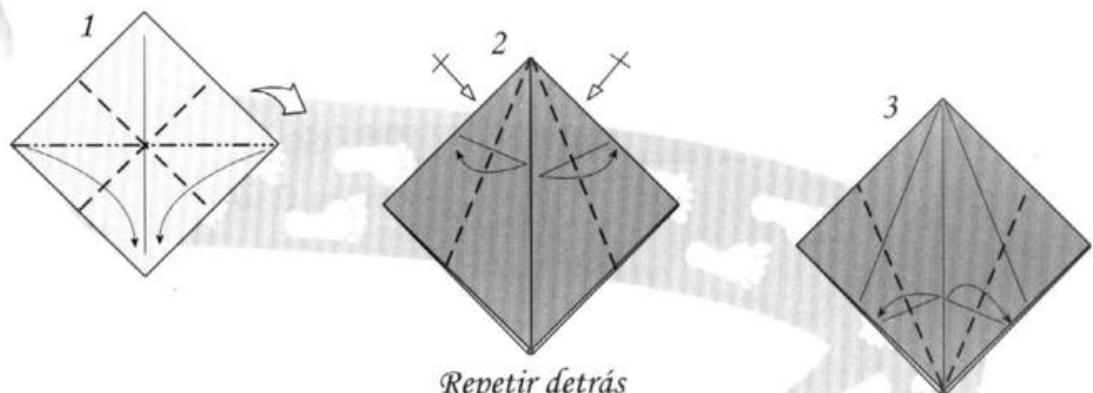

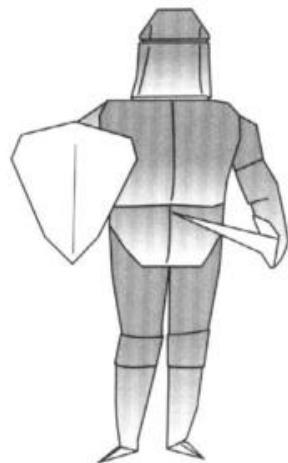

Papel «sándwich»

La papiroflexia, el arte del plegado del papel, es capaz de recrear monstruos, dragones, sirenas y muchas otras criaturas fantásticas, únicamente con tus manos y un trozo de papel, sin cortar ni pegar.

Si estás preparado para el apasionante reto del «origami», abre las páginas de este libro, pero cuidado, ya nada será lo mismo.
